## Skills

- MySQL
- Python
- HTML
- CSS
- GITHUB
- PHP
- GIT
- Excel

## Projects

- **FORMULA 1 PODIUM PREDICTION**

Built a machine learning model to predict F1 driver race results using historical data. Created a Streamlit app where users can input race details and get predicted finishing positions, along with model accuracy and visual insights.

- **ONLINE SALES PLATFORM FOR BIKE ACCESSORIES**

Created a user-friendly online platform for browsing and purchasing bike accessories. Implemented product catalog, cart system, order management, and responsive UI for a smooth shopping experience.
